

What do I need to prepare before issuing my mobile foreigner residence card?

You will need an residence card and an Android smartphone or iPhone registered in your name.

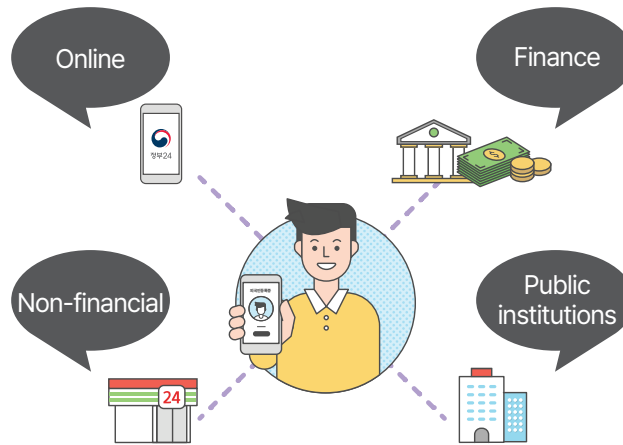

Issuance is not possible in this case.

- Smartphones opened under the corporate name and anonymous prepaid phones cannot be issued. (Mobile foreigner residence cards can be issued for smartphones and anonymous prepaid phones registered under the corporate name with a corporate proxy.)
- If you use Tplus (T Plus) among the budget mobile carriers, you cannot issue a mobile residence card through networks other than LGU+.
- Mobile residence cards can only be issued on Android devices running OS 8.0 or later; iPhone devices running iOS 16 or later, biometric authentication, and NFC; Blackberry devices are not supported.

Where can I use my mobile foreigner residence card?

The mobile foreigner residence card can be used anywhere a physical ID card can be used.

- When identity verification is required offline (at the immigration office or foreigner office)
- When an ID is required for financial services such as banking
- At convenience stores or stores that require adult verification
- When you are required to present your ID at a hospital or public institution

※ The scope of use other than immigration and foreigner offices is expected to gradually expand
